

Unlock the Power of Imagination – Join the FUTURES LITERACY WORKSHOPS!

Are you curious about how we can shape the present by imagining multiple futures? As part of the Dialog City project, we invite you to participate in a unique series of Future Literacy workshops in Greece that explore how thinking about the future can transform the way we understand and act in the world today. These interactive sessions have been designed by artists for active citizens, educators, and anyone who is called to make decisions and wants to explore new tools for creativity, collaboration, and social change.

FUTURES LITERACY is a UNESCO-recognized competency that empowers individuals and communities to better anticipate, adapt, and shape change. Through hands-on activities, guided reflection, and group discussion, participants will learn to use the future as a lens for discovery and innovation. Whether you have experience thinking about the future or are completely new to the concept, these workshops will offer valuable insights and inspiration.

Space is limited, so register now to secure your spot in this dynamic, exploratory experience. Let's imagine – and build – possible futures together!
